ABSTRACT

This 1969-70 directory of public elementary and secondary schools provides the names of and basic information on local school systems in the United States and its possessions. In this directory, the listing includes all systems regardless of size, as well as nonoperating public school districts. The main body of the directory lists, in alphabetical order by State, the local public school systems. The following information is provided for each system: name of unit, superintendent's location, ZIP code, county name, grade span, and enrollment. Also included are (1) summary tables showing the number of local public school systems and their distribution by size, grade span, and State; and (2) a listing of the names of the superintendents of the operating public school systems with 10,000 or more pupils. Types of basic administrative units listed include common, city, independent, consolidated, separate elementary or high school, union, community, town, township, jointure, county-unit school districts, and vocational and technical high schools. Omitted are State-operated schools (except where the State agency functions as a local agency), Federally operated schools, intermediate agencies other than supervisory unions, and elementary and secondary schools operated by colleges and universities. INTRODUCTION

The primary purpose of this annual directory is to list all local agencies in the United States and the Outlying Areas that provide free public elementary and secondary education. The mailing address and some descriptive information are given for each local public school system. In this edition, the list of school systems is for fall 1969. Most of the data are also for that time, but occasionally are reported for an earlier period.

In previous years, the listing included only school systems with enrollments of 300 or more. This year for the first time it includes all systems regardless of size, as well as nonoperating public school districts.

The directory lists all types of basic administrative units concerned with public elementary and secondary schools. These administrative units represent a wide variety of school system types, such as common, city, independent, consolidated, separate, union, community, town, township, jointure, and county-unit school districts and separate vocational and technical high school systems.

Excluded are federally operated schools, State-operated schools (except where the State educational agency functions as a local educational agency, as in Hawaii), and intermediate agencies other than supervisory unions. Also omitted are elementary and secondary schools operated by colleges and universities or by agencies engaged exclusively in highly specialized educational programs, such as rehabilitation centers.

USING THE DIRECTORY

Name of Unit

This column shows the names of all local public elementary and secondary school systems in the United States, listed by State.

Within each State, operating school systems are listed first, followed by nonoperating districts -- that is, those that exist as legal entities but do not currently operate schools. In both of these broad categories, the systems are listed in alphabetical and numerical order.

In four New England States (Maine, Massachusetts, New Hampshire, and Vermont), many of the small school systems cooperatively use the services of a common superintendent in a "supervisory union." In the listings for these States, the school systems not part of a supervisory union are listed in accordance with the general format, followed by the supervisory unions with the component school systems listed within each union. Nonoperating districts within supervisory unions are listed with their supervisory unions.

Information for the six Outlying Areas of the United States is given after the State listings.

Location of Superintendent

This column shows the mailing address for each operating school system. The address given for a supervisory union also applies to its component districts. No information is given here for nonoperating districts.

These place names have been carefully edited and revised to conform to U.S. Post Office nomenclature, especially in abbreviations. For this reason, there are occasional differences in terminology between this column and others (i.e., Name of Unit and County Name) where locally accepted spelling and spacing have been retained.

Zip Code

The ZIP Code, given for each operating system, should be included whenever mail is addressed to a school system.

County Name

This information is given for both operating and nonoperating districts. If a school system overlaps county lines, the county listed is the one in which the school system office is located. In the listing for Alaska, election districts rather than counties are given in this column.

Grade Span

These entries represent the lowest and highest grades taught in a system, from prekindergarten (PK) to grade 12. In addition, the symbol UG is used to denote an ungraded system. There were some cases, primarily in the vocational school area, where the respondents did not feel that a grade-span designation could be properly applied. For these sytems, as well as for supervisory unions and nonoperating districts, no information is given in this column.

Pupils

Although the pupil measure requested from respondents was the average daily membership (ADM) for the 1968-69 school year, 16 States reported other measures as follows:

California	- Fall 1968 enrollment; does not include kindergarten
Connecticut	- Fall 1968 enrollment
Idaho	- 1968-69 average daily attendance (ADA)
Illinois	- Fall 1968 enrollment

Kansas - Fall 1968 enrollment
Kentucky - Fall 1968 enrollment
Louisiana - Fall 1967 enrollment
Massachusetts - Fall 1968 enrollment
Montana - Fall 1968 enrollment
Nevada - 1968-69 ADA
New Jersey - Fall 1968 enrollment
New York - Fall 1968 enrollment
Pennsylvania - Fall 1968 enrollment
South Dakota - Fall 1968 enrollment estimated by U.S. Office of Education. Previous year's ADM not applicable, due to extensive reorganization.
Virginia - 1968-69 ADA
Wyoming - Fall 1968 enrollment

Since pupils residing in nonoperating districts are counted in the systems in which they attend school, no pupil measure is given for nonoperating districts.

Brief definitions* of the measures used are:

1. Average daily membership -- the average number of pupils on the school rolls (present and absent) during the school year.
2. Average daily attendance -- the average number of pupils actually attending school during the school year.
3. Fall enrollment -- the popular term for fall membership, which is the number of pupils on the rolls on a specific date early in the school year, usually October 1.

No adjustments for the nonstandard pupil measures were made in the listings or in the summary tables. The difference between ADM and the other two measures, based on recent national totals are:

1. ADA is approximately 94.3 percent of ADM.
2. Fall enrollment is approximately 101.6 percent of ADM.

Schools

Entries in this column indicate the total number of public elementary and secondary schools in each operating system. When this information was not available, no entry appears, as for the States of Michigan, Missouri, Oklahoma, Oregon, and Tennessee, and for miscellaneous school systems in other States.

---

* These definitions are abbreviated versions of those found in The Common Core of State Educational Information (Handbook I), U.S. Department of Health, Education, and Welfare, 1953.

Special Cases

Exceptions to the general format of the directory listing are as follows:

The California listing includes "county special" school systems. These are general elementary and secondary educational programs operated in county and State institutions under the administration of the county superintendent of schools. Grade-span information was not provided for these systems.

Some countywide vocational and technical schools are separate administrative units rather than parts of the local public school systems within whose boundaries they are located. Although these schools are listed separately, no pupil figures are given for them because their pupils were included in the counts of the regular school systems.

In addition to the occasions cited above, omissions of pupil data also occur when a school district is in its first year of operation, having no previous year's ADM.

Where a school system is located near a State boundary and has a post office address in the adjoining State, the abbreviated name of that State is given in the "Location of Superintendent" column.

Comparability With Other Reports of the U.S. Office of Education

The numbers shown for pupils and schools are intended to be fairly accurate descriptors of the size of the systems listed. Although State and national totals of these figures may differ somewhat from those given in most statistical publications of the Office of Education, comparable official State totals on number of school systems and fall enrollment are provided by the State educational agencies and published in the Fall 1968 Statistics of Public School Systems (OE-20007-68).

Mailing to School Systems

The following form of address is suggested for writing to the head of a local school system:

Superintendent of Public Schools
Name of school system
City or town, State ZIP Code

Mail addressed in this manner, even without a street address, should reach its destination without difficulty.
